

JEFREEZE OAT 50%

Long-Life OAT Coolant · Ethylene Glycol · Ready to Use

DESCRIPTION

Jefreeze OAT is a long-life coolant based on the most advanced organic-acid technology (OAT). It protects all engines from frost damage and provides outstanding protection against rust and corrosion for all parts of the cooling system — recommended for all-year-round use. This ethylene-glycol-based antifreeze is designed to meet the demands of modern engines and their cooling systems.

PACK SIZES

Multiple pack sizes available on request.

FEATURES & BENEFITS

- Long-life protection against engine freezing and overheating
- Excellent corrosion defence for all cooling-system components, including aluminium
- Prevents limescale and deposit build-up — keeps the system clean and efficient
- For passenger cars and light-duty commercial vehicles, gasoline or diesel
- Safe for rubber hoses, seals and gasket materials
- Pre-mixed with demineralised water — no dilution required

PHYSICAL PROPERTIES

PROPERTY	TYPICAL VALUE
Concentration	50 %
Colour	Green
pH	8
Freezing point	< -30 °C
Boiling point (reflux)	> 110 °C
Appearance	Clear

Typical values shown do not constitute a specification. The information is based on current knowledge and is intended to describe the product for possible applications; it does not release the user from performing preliminary tests.
